

Technical Specifications

HERITAGE STONE consists of various shapes and styles of non-structural pre-cast veneer units consisting of cement, lightweight aggregates, mineral oxide pigments and other additives.

Physical Properties

- Weight - 40 - 50 kg per m² depending on profile
- Colour retention - no change after years of weathering
- Combustion - nil flame spread, nil fuel contribution, nil smoke development
- Water absorption (unsealed) - 20 per cent
- Freeze-Thaw test - 0.66 per cent
- Shear test - 335 kPa

Adhesives

1 part Bondplus mixed with 2 parts water and added to a 3 parts sand / 1 part cement mortar mix.

Sealers

Water based or solvent based concrete sealers depending on gloss levels required.

Surfaces suitable for Cladding

- Clay brick
- Concrete
- Concrete block
- Fibre cement board (Eterpan is recommended - available from PBS)
